

# Problems with uploading photos with Clipbucket

In case photos upload process in Clipbucket never finishes, and while trying to access the photos, the error message like "**Unknown column 'photo\_details' in 'field list'**" is displayed. The fix is the following.

Go to phpmyadmin, select Clipbucket's DB and execute the query below:

```
ALTER TABLE `cb_photos` ADD `photo_details` TEXT NOT NULL AFTER `photo_tags`
```

---
