

Configure my scripts to use FFmpeg, Mencoder, and FLVtool2?

If your script supports modification of the paths to php, ffmpeg, mencoder, and flvtool2 then please try these settings for your youtube clone script:

PHP - /usr/local/bin/php
FFMpeg - /usr/local/bin/ffmpeg
Mencoder - /usr/local/bin/mencoder
FLVTool2 - /usr/bin/flvtool2
