How do I change the color and font type of the text on my site?

To change the color and font type of the text on your site, we would suggest that you use the Style Designer feature. This will allow any changes you make to be site-wide; it will keep your site looking clean and consistent.

To change the color and font of the text on your site:

1. Click on Style > Style Settings > Style Designer.
2. In the Colors section you will see the ability to change the color for the Second through Sixth headers, as well as the Paragraph Text. You can choose a color from the palette or put in your own HEX number.
3. In the “Fonts” section you will see the ability to change the font type for the Second through Sixth headers, as well as the Paragraph Text.
4. Click “Save"
