How do I change the color of my link text?

To change the color of your link text, we would suggest that you use the Style Designer feature. This will allow any changes you make to then be site-wide; it will keep your site looking clean and consistent.

To change the color of link text:

1. Click on Style > Style Settings > Style Designer.
2. Look at the Colors section.
3. You can change the color of the links throughout your site including: link, link hover and link visited.
4. Click “Save.”
