Microsoft mail (Outlook, MSN, Hotmail) - whitelist emails from GlowHost

All you need to do is to find the email in Junk folder and mark it as not spam. This way next emails from same recipient will be delivered to inbox.

1. Open the **Junk** folder and find the email from GlowHost.
2. Right click on the email and choose **Not junk** option.

That's all. Since now emails from GlowHost won't be marked as spam.
